

Inspired by the phrase “Creativity is intelligence having fun” – A. Einstein

LET’S REDEFINE MONEY...

If money, as we know it, only grows in your favor sometimes,
If supply and demand only balance out in your favor sometimes, and
If luck in money is only on your side sometimes...

WHY NOT HAVE SOME FUN AND CREATE A NEW CONCEPT?

One that grows in your favor,
One that’s always on your side,
One you can use without risks.

Bettercoin is a game-changing concept in money that always plays to your advantage:

- Its algorithmic price rises with whichever climbs higher between Bitcoin and Ether, or drops with whichever falls less.
“Goodbye, inflation.”
- Its price isn’t manipulated by so-called supply and demand balance.
“Goodbye, big players controlling the game.”
- If you transfer BETTER and don’t get paid, you can easily get it back.
“Goodbye, payment defaults.”
- If selling it yourself is a hassle, you can delegate the sale.
“Goodbye, wasted time on trading.”
- If you are an investor, you can use BetterOne for smart tokenization.
Goodbye, trading—investing is my thing.”

"Sold through marketplaces, social media, directly between wallets, on DEXs, or through the Delegate scheme—no intermediary risks, no price manipulation, no cybersecurity threats, no losses, and no payment risks."

Bettercoin is the ideal asset for creative, intelligent, fun, and healthily ambitious people.
